

XS INTERNATIONAL'S IT ASSET DISPOSITION AND RECYCLING

XS International provides IT Asset Disposition and Recycling Services

- » Asset Management
- » Inventory Audit & Tracking
- » Logistics
- » Redeployment
- » Warehousing
- » Lease Returns
- » Data Sanitization
- » Compliance Review

CUSTOMER BENEFITS:

- » **Security Commitment:** Our auditable security framework protects the chain-of-custody to significantly reduce the potential for data security breaches and environmental compliance issues. From onsite equipment receipt, through processing and disposition all assets are subject to serialized audit procedures, and available for customer review.
- » **Environmental & Data Security:** Our focus on environmental sustainability governs every aspect of what we do. XSi partners comply with ISO14001 and BAN standards. We provide contractual guarantees indemnifying our customers against environmental compliance risks. We provide full downstream transparency and accountability through onsite audits and contractual agreements.
- » **Remarketing:** Our multi-tiered approach to asset re-sales leverages mature channels, providing significantly higher returns than our competitors.
- » **Professional Services:** Our approach to ITAD is to provide a one-stop shop for end-of-life asset management, providing our customers the professional management and best practices to realize the real bottom line value of ITAD within their organization.
